

Wellbeing Principle

This visual tool will support you to embed the principle of 'wellbeing' into your practice.

The Care Act 2014, Section 1, introduced the core principle that local authorities **must** promote wellbeing when carrying out any of their care and support functions in respect of a person. This is referred to as “the wellbeing principle” because it is the guiding principle that puts wellbeing at the heart of care and support.

All areas of wellbeing should be considered of equal importance.
